Introduction

This volume of the National Transit Database (NTD) Annual Report consists of profiles for each transit agency filing an NTD annual report for the 2008 report year. A profile consists of general, financial, and modal data, as well as performance and trend indicators.

For the 2008 report year, 692 transit agencies submitted data. Of that, 101 agencies operated nine or fewer vehicles across all modes and types of service (TOS), and 15 received a waiver from detailed reporting. Thus, 576 agencies are included in the NTD database.

Over the last few years the NTD has undergone significant changes and enhancements and the profiles have been redesigned to accommodate these changes.

Revenues accrued through a purchased transportation agreement are separated into sellers with purchased transportation agreements with an NTD reporter and sellers with purchased transportation agreements with a non-NTD reporter. Previously, sellers of service to non-NTD reporters detailed funding by the source of the buyer's funds, e.g., general revenues of a local governmental entity. The top portion of the profiles contains both general and financial information. General information includes urbanized area (UZA) statistics, service area statistics, service consumption (system wide), service supplied (system wide) and vehicles operated in maximum service (VOMS).

Financial information includes fare revenues earned, fare revenues applied to operations, sources of operating funds expended, summary of operating expenses (OE), sources of capital funds expended and uses of capital funds. Two pie charts graphically depict sources of operating funds expended and capital funds expended. The remainder of the profile presents information at mode level. All modes are included. Bus (MB) and heavy rail (HR) always appear first and second if operated by an agency.

The top portion of the profiles contains both general and financial information. General information includes urbanized area (UZA) statistics, service area statistics, service consumption (system wide), service supplied (system wide) and vehicles operated in maximum service (VOMS).

Financial information includes fare revenues earned, fare revenues applied to operations, sources of operating funds expended, summary of operating expenses (OE), sources of capital funds expended and uses of capital funds. Two pie charts graphically depict sources of operating funds expended and capital funds expended. The remainder of the profile presents information at mode level. All modes are included. Bus (MB) and heavy rail (HR) always appear first and second if operated by an agency.

Operating expenses (OE), fare revenues, and services supplied and consumed by mode do not include purchased transportation (PT) data reported by the sellers of service.

Fixed guideway directional route miles (FG DRM) include the total DRM at the agency's fiscal year end (FYE). FG segments used by more than one agency are included for each agency reporting the segments.

Performance measures are derived from individual mode characteristics and represent cost efficiency, cost effectiveness, and service effectiveness. Graphs highlight selected performance measures over the last ten years for the modes shown in lines one and two.

Anomalies may exist in these graphs as the result of one or more of the following:

- A report may not have been received for a particular year
- A waiver may have been granted
- Following validation, data may have been partially or completely deleted, or
- Data may have been deemed questionable in a particular year.
- Starting in 2006, a separate file documenting all data items deemed questionable during validation will be provided on the NTD website. However, data items waived, deleted, or not reported were indicated next to the data item.

Appendix A provides an aggregate profile for all transit agencies included in the 2008 database. Appendix B identifies agencies receiving FTA-approved reporting exemptions. Appendix C provides a cross-reference identifying where each data item in the profiles can be located in an agency's National Transit Database report, as well as the algorithms used in determining these items.

Additional National Transit Database publications include:

- The Data Tables
- National Transit Summaries and Trends, and
- Transit Profiles the Top Fifty Agencies.

Transit Profiles: All Reporting Agencies — NTD 2008 Report Year

All are published annually and are available for viewing or download at <http://www.NTDProgram.gov>.
